

Trimble S7

TOTAL STATION

The most productive total station

The Trimble® S7 total station combines scanning, imaging and surveying into one powerful solution. The Trimble S7 is the system for efficient surveying, allowing you to adapt to any situation and increasing your productivity in the field. The combination of Trimble SureScan™ technology, Trimble VISION™ technology, Trimble FineLock™ technology and DR Plus technology, along with many other features, means you'll be able to collect data faster and more accurately than ever before.

Key features

- Surveying, imaging and scanning in one powerful solution
- Trimble VISION technology for video robotic control, scene documentation and photogrammetric measurements
- Trimble Sentinel real-time location information
- Trimble DR Plus EDM for long range and accuracy
- Intuitive Trimble Access™ field software
- Trimble Business Center office software for quick data processing

Integrated scanning

Save time in the field and in the office with Trimble SureScan technology. Now you have the flexibility to perform scans every day. Capture the information you need to create digital terrain models (DTMs), perform volume calculations and make topographic measurements faster than with traditional surveying methods. SureScan technology enables you to collect and process data faster by focusing on collecting the right points, not just more points.

Trimble VISION technology

Trimble VISION technology gives you the power to direct your survey with live video images on the controller as well as create a wide variety of deliverables from collected imagery. Capture measurements to prisms or reflectorless with point-and-click efficiency via video. Document your site and add notes directly to the pictures in the field to ensure you never miss that critical information. Back in the office, you can use your Trimble VISION data for measurements, or to process panoramas and high dynamic range (HDR) images for even clearer deliverables.

Trimble DR Plus EDM

Trimble DR Plus range measurement technology provides extended range of Direct Reflex measurement without a prism. Now you can measure further with fewer instrument set-ups and enhance your scanning performance. Trimble DR Plus, combined with the smooth and silent Trimble MagDrive™ servo technology, creates unmatched capability for quick measurements, without compromising on accuracy.

Manage your assets

Know where your total stations are 24 hours a day with Trimble Sentinel technology. See where your equipment is at any given time and get alerts if your instrument leaves a job site or experiences unexpected equipment shock or abuse.

Powerful field and office software

Choose from a variety of Trimble controllers operating the feature rich, intuitive Trimble Access™ field software. Streamlined workflows like Roads, Utilities and Pipelines guide crews through common project types, helping to get the job done faster with less distractions. Trimble Access workflows can also be customised to fit your needs.

Back in the office, trust Trimble Business Center to help you check, process and adjust your optical and GNSS data in one software solution.

Trimble Protected protection plans

Add a Trimble Protected protection plan for worry-free ownership over and above the standard Trimble product warranty. Added enhancements include coverage for wear & tear, environmental damage, and more. Accidental damage is covered with Premium plans, available only at point-of-sale in selected regions. For details, visit trimbleprotected.com or contact a local Trimble dealer.

- 1 0.5 frames per second with remote operation.
- 2 The capacity in -20 °C (-5 °F) is 75% of the capacity at 20 °C (68 °F).
- 3 Bluetooth type approvals are country specific. Contact your local Trimble Authorised Dealer for more information.
- 4 Functionality and availability dependent on region.
- 5 Standard deviation according to ISO17123-3.
- 6 Standard deviation according to ISO17123-4.
- 7 Standard clear: No haze. Overcast or moderate sunlight with very light heat shimmer.
- 8 Range and accuracy depend on atmospheric conditions, size of prisms and background radiation.
- 9 Kodak Gray Card, Catalog number E1527795.
- 10 Target colour, atmospheric conditions, and scanning angles will impact range.
- 11 Target shape, texture, and colour; grid size; and distance and angle to target; will impact speed.
- 12 Dependent on selected size of search window.
- 13 Solution acquisition time is dependent upon solution geometry and GPS position quality
